

## Programming Options

**Low Ropes:** Want to take professional development to the next level? Our skilled facilitators will teach the latest in essential skills for effective teams, but we will not lecture you from a projection screen. Your team will be divided into groups of 7-12 participants. These teams will work to overcome team building challenges on the low ropes course. Each challenge is unique and is designed to develop and strengthen communication skills, collaboration, leadership, problem solving skills and more. Tell us what you would like to focus on and we will build a program designed to meet your needs! Have your own professional development curriculum? Share it with us and we will turn it into a fun team building day of experiential learning on the challenge course.

- 3-4 hours
